- ★ Long term peace of mind

★ Limited Lifetime Warranty on Your Zirconia Restoration

What Could Change Your Price

Every case is unique. The prices above cover the vast majority of patients. The items below are only added if your specific situation requires them — and we will always discuss costs with you before proceeding.

IV Sedation or General Anesthesia \$2,000 – \$4,800

WHEN IT APPLIES

For patients who prefer to be fully sedated or asleep during their surgical appointment. Available as an optional upgrade for added comfort.

Extensive Grafting or Sinus Procedures \$1,000 – \$5,000

WHEN IT APPLIES

When significant bone rebuilding or sinus lift procedures are needed prior to or during implant placement to ensure a stable, long-term foundation.

Additional Implants \$1,500 – \$2,500 each

WHEN IT APPLIES

When your anatomy, bone density, or case complexity requires more than the standard amount to provide the best long-term support for your restoration.

"Tooth Only" Implant Restoration \$4,000 – \$8,000

WHEN IT APPLIES

Specialized implant treatment where implants are placed and your natural gums are saved and used, providing a more conservative treatment option. Known as an "FP1" prosthetic

Remote Anchorage Implants (Pterygold, Palatal, Trans-Sinus, or Zygomatic Implants) \$3,000 – \$20,000

WHEN IT APPLIES

Specifically for extremely atrophic or complex cases where standard implant sites are not available. These highly specialized implants allow full-arch restoration for patients who have been told they are not candidates for traditional implants.

Bar-Reinforced Zirconia (Titanium Framework) \$2,000 – \$4,000

WHEN IT APPLIES

When additional structural reinforcement is needed inside your zirconia prosthesis. A titanium framework is embedded within the restoration for enhanced durability in specific bite and bone situations.

Annual Maintenance Plan \$250 – \$500 per year

WHEN IT APPLIES

Required annually to maintain your Premium Arch limited lifetime warranty. Includes a professional cleaning, implant health assessment, and bite evaluation to keep your restoration performing at its best for years to come. Not required for Essential Arch.
